Summary

Backend-focused Full Stack Developer with 1.5+ years building and deploying Node.js/Express applications on MySQL and MongoDB. Built 6 client applications at Quark Consulting, including a Xero accounting automation that turned 15–20 minutes of manual statement work into one click.

Experience

Full Stack Developer Jul 2025 – Present
Quark Consulting *Indore*

- Built and delivered 6 client applications end to end (property, workforce, marketing analytics, health-tech): Node.js/Express REST APIs, MySQL and MongoDB schemas, React front-ends.
- Migrated 10+ production websites with near-zero downtime, moving one VPS to another and a shared-hosting account onto several company and client VPS servers: Nginx, PM2, SSL, database backup & restore and DNS cutover.
- Deployed 6–7 of my own applications and several teammates' projects to Linux VPS servers with Nginx reverse proxy, PM2 process management and SSL.
- Built n8n automations: a lead pipeline (Facebook group → Google Sheets → CRM leads and deals) and a Vapi AI voice assistant that answers calls for a salon.

Full Stack Web Developer Intern Jan 2025 – May 2025
Shanti Infosoft LLP *Indore*

- Built ResolveHub, a MERN ticketing system: users raise and track tickets; admins assign, prioritise and update status through JWT-protected admin routes.
- Tested REST APIs with Postman and built responsive React + Tailwind CSS dashboards for users and admins.

Client Projects (Quark Consulting, under NDA)

Property Management Platform | *Node.js, Express, MySQL, Xero API, React* | *live*

- Automated the rent cycle with Xero over OAuth2: rent invoices created in Xero every 30 minutes, payments read back and split into management fee and landlord share, landlord bills created after admin approval.
- Built a daily Xero bank-transaction import with exact-amount auto-matching and a review queue; unique keys prevent duplicates and API calls are throttled under Xero's rate limit.
- Cut landlord statement preparation from 15–20 minutes of manual work to one click (auto-filled data, PDF generated and emailed); scheduled 8 cron jobs with an overlap guard; added email-OTP admin login.

Workforce Management SaaS | *Node.js, Express, MySQL, React* | *live, rollout in progress*

- Built rostering, timesheets, clock-in and leave management for employers, to replace a paid commercial tool.
- Implemented secure login with 15-minute JWT access tokens and rotating refresh tokens in httpOnly cookies, revoking all sessions if an old token is reused; 5-level role-based access through Express middleware; login rate limiting.

Marketing Analytics Dashboard | *Node.js, Express, React*

- Combined 8 marketing and CRM APIs (Google Analytics, Google Ads, LinkedIn, Mailchimp, Meta, Asana) into one dashboard with parallel requests, per-API failure isolation and a 30-minute cache.

AI Dental Screening App | *Node.js, Express, MongoDB, React, n8n*

- Built a 5-photo upload (Multer) → n8n AI workflow → per-view screening report; email-OTP signup with a MongoDB TTL index and JWT refresh-token login.

Technical Skills

Backend: JavaScript (ES6+), Node.js, Express.js, REST APIs, JWT, OAuth2, role-based access, Multer, node-cron
Databases: MySQL, SQL, MongoDB (Mongoose)
Integrations & Automation: Xero API, Google APIs, Mailchimp, n8n, Vapi, webhooks
DevOps: Linux VPS, Nginx, PM2, Docker (basic), SSL, DNS
Frontend & Tools: React.js, Tailwind CSS, Git, GitHub, Postman, AI-assisted development (Claude Code)

Education

MediCaps University, Indore 2023 – 2025
Master of Computer Applications (MCA) *CGPA: 7.58*

Vikram University, Ujjain 2020 – 2023
Bachelor of Computer Applications (BCA) *Percentage: 75.5%*
